

Appendix B Breeding Programs

Complete Appendix B for all proposals planning on establishing a breeding colony or for those studies utilizing time-pregnant animals. Studies incorporating breeding programs or offspring from time-pregnant animals will be required to report annual production (number of offspring used) at the time of IACUC protocol annual renewal.

1. Provide a specific description of the type of breeding program to be utilized (harem, monogamous pair, etc).

2. Identify personnel responsible for the breeding program.

3. Identify personnel responsible for maintaining breeding program records.

4. How many adults will be utilized in this breeding program?

5. What is the final disposition of these adults at the conclusion of their breeding program?

6. How many offspring are anticipated from each breeding or time-pregnancy?

7. What is the final disposition of any offspring not utilized in the experimental program?
